

Centre for Advanced Energy Systems Analysis - Roma

Roma, December 28, 2011

Dear Colleagues,

we are pleased to send you the program of the Summer School of Thermodynamics - Roma, which will be held in Anzio from June 11 to 23, 2012.

The school consists of an intensive series of lectures (7 hours per day, each day including Saturdays), which carry 6 ECTU (European Credit Units) granted by the University of Roma La Sapienza and transferrable to the attendees' curricula. Each attendant will receive a diploma upon completion of the course load. The school is aimed at graduate- and at sufficiently proficient Seniors students in Engineering, Physics, and Environmental Sciences.

All courses are taught in English, and the course material will be distributed after successful completion of the registration, before the courses begin.

You will find the registration and the financial application forms, the manifesto of the school and a set of instructions on the procedures to follow to enroll on www.turbomachinery.it

We hope the participation will be as strong and qualified as last year's, and are sure that your students will benefit from our program.

For any question/problem, please contact me or the co-director Professor Melli or the Event Organizer Claudio La Rosa: our contacts are attached hereto.

Best regards to you all,

Enrico Sciubba
School Director
